

## Central America and Caribbean :: Jamaica

### Introduction :: Jamaica

#### Background:

The island - discovered by Christopher COLUMBUS in 1494 - was settled by the Spanish early in the 16th century. The native Taino, who had inhabited Jamaica for centuries, were gradually exterminated and replaced by African slaves. England seized the island in 1655 and established a plantation economy based on sugar, cocoa, and coffee. The abolition of slavery in 1834 freed a quarter million slaves, many of whom became small farmers. Jamaica gradually increased its independence from Britain. In 1958 it joined other British Caribbean colonies in forming the Federation of the West Indies. Jamaica gained full independence when it withdrew from the Federation in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence as rival gangs affiliated with the major political parties evolved into powerful organized crime networks involved in international drug smuggling and money laundering. Violent crime, drug trafficking, and poverty pose significant challenges to the government today. Nonetheless, many rural and resort areas remain relatively safe and contribute substantially to the economy.

Economy :: Jamaica

<b>Economy - overview:</b>
The Jamaican economy is heavily dependent on services, which accounted for more than 60% of GDP at the end of 2011. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up roughly 5%. The bauxite/alumina sector was most affected by the global downturn while the tourism industry was resilient. Tourism revenues account for roughly 5% of GDP in 2011. Jamaica's economy faces many challenges to growth: high crime and corruption, large-scale unemployment and underemployment, and a debt-to-GDP ratio of nearly 130%. Jamaica's onerous public debt burden is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector. In early 2010, the Jamaican Government created the Jamaica Debt Exchange in order to retire high-priced domestic bonds and significantly reduce annual debt servicing. Despite the improvement, debt servicing costs still hinder the government's ability to spend on infrastructure and social programs, particularly as job losses rise in a shrinking economy. Jamaica was hard hit by the effects of the global economic crisis, experiencing economic contractions from 2008-10 and growth remains low. The SIMPSON-MILLER administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious crime problem that is hampering economic growth. High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade. As of late 2012, the SIMPSON-MILLER government was working to negotiate a new IMF Stand-by agreement to gain access to additional funds.
